PROFESSIONAL SUMMARY

Fresh MCA graduate (CGPA: 9.13) with strong foundations in **Generative AI, LLMs, Python, and AI/ML** gained through 3 internships at IBM, Infotact Solutions, and LivNSense. Skilled in **Prompt Engineering, LangChain, Pandas, NumPy, PySpark**, and REST API development. Eager to grow as a **GenAI & Python Developer** at EXL — available for Noida or Bangalore.

TECHNICAL SKILLS

GenAI & LLMs: LLMs, Generative AI, Prompt Engineering, LangChain, Hugging Face, OpenAI API
Python & Libraries: Python, Pandas, NumPy, PySpark, Scikit-learn, TensorFlow, OpenCV, Matplotlib
AI / ML: Machine Learning, Deep Learning, Computer Vision, Data Preprocessing, Model Training
Backend & APIs: FastAPI, Flask, REST API, Backend Development
Databases & Tools: MySQL, Git, GitHub, Jupyter Notebook, VS Code, PyCharm
Cloud & OS: AWS, Linux, Windows
Core CS: Data Structures & Algorithms, OOP, Agile Methodology

WORK EXPERIENCE

Software Engineer Intern — LivNSense
Nov 2025 – Present | Bangalore, India

- Engineered and deployed **5+ Python & REST API modules** (FastAPI, MySQL), improving system reliability by 20%.
- Accelerated **backend data pipelines**, reducing latency by 30% to support real-time AI-driven operations.
- Applied **Generative AI and LLM** concepts to prototype intelligent automation features in Agile sprints.

Python Developer Intern — Infotact Solutions
Mar 2025 – Jul 2025 | Remote

- Designed **10+ Python application features** using Pandas and NumPy; improved code maintainability by 25%.
- Optimised MySQL query performance by 15%; built **PySpark-style** pipelines for large-scale data transformation.

AI and ML Intern — IBM
Oct 2024 – Nov 2024 | Remote

- Executed end-to-end **ML pipeline** (data preprocessing, model training, evaluation) achieving **90%+ accuracy**.
- Deployed 2 ML models; applied **Prompt Engineering** with IBM tools, reducing manual testing effort by 35%.
- Gained practical exposure to **Generative AI frameworks and LLMs** in industry workflows.

PROJECTS

AI-Powered UAV Detection & Motion Prediction | Python, OpenCV, TensorFlow, Deep Learning
- Architected real-time UAV detection at **30+ FPS**; improved accuracy by 18% with motion-prediction algorithms.
- Refined inference pipeline, cutting processing time by 25% while maintaining **92% detection precision**.

Future-Ready ISP Management System | Python, Machine Learning, MySQL, Dashboard
- Automated billing for **1,000+ accounts** (99.9% accuracy); ML threat detection flagged 95%+ network anomalies.
- Built **5-KPI dashboard** with Pandas & Matplotlib, cutting manual audit time by 40% via real-time analytics.

GenAI Prompt Engineering Experiments | Python, LangChain, OpenAI API, Hugging Face
- Built prompt-chaining workflows with **LangChain & OpenAI API** for text summarisation and Q&A generation.
- Fine-tuned prompt strategies across multiple LLMs, achieving reliable structured outputs consistently.

EDUCATION

MCA (Master of Computer Applications) — Madanapalle Institute of Technology and Science | 2023–2025 | CGPA: **9.13/10**
BCA (Bachelor of Computer Applications) — Shri Gnanambica Degree College | 2020–2023 | CGPA: **8.90/10**

CERTIFICATIONS

• Python Fundamentals — IBM (Dec 2024) • SQL and Python — HackerRank (Jan 2025)
• Exploratory Data Analysis — NASSCOM (Oct 2024) • Database Administration Fundamentals — Microsoft (Mar 2023)
• Network Essentials — Cisco (Dec 2023) • C Programming — NPTEL (Jan 2024)
